PROFESSIONAL ADVISERS ONLY

7IM Funds and Model Portfolios

Succeeding together

#### Capital at risk

You should be aware that the value of investments may go up and down and you may receive back less than you invested originally.

7IM considers that the obligation to provide appropriate advice and explain the risks inherent in the portfolios falls to advisers.

# 7IM & risk mapping

At 7IM we recognise the need for financial planners to provide investment solutions that are appropriately matched to their clients' risk profile scores.

To this end, we work with a number of leading risk profiling tool providers, who 'map' our Funds/Model Portfolios to their risk profile scores.

It is important to emphasise that these risk profiling tools are only one aspect of an adviser's suitability process, and others such as the client's investment term / horizon, knowledge and experience should also be considered. The methodology of the third party risk profiling tools is not endorsed by 7IM and individual fund risk profiling scores may not correspond precisely to the risk indicators in the 7IM fund literature. The responsibility for the mapping rests with these providers. The Risk Management Team at 7IM maintains a close dialogue with them all, to discuss how most appropriately to interpret the 7IM investment and risk management processes with respect to their risk rating process.

### defaqto

Defaqto's vision is to help people make better informed decisions. Risk Ratings are a key element of how they achieve this, by helping advisers match suitable funds with their clients' mandates. Risk Ratings uniquely map fund family members to Defaqto's 10 risk profiles. These have been created in partnership with Moody's Analytics. A Risk Rating of 1 indicates that a proposition represents the lowest risk profile; a Risk Rating of 10 indicates the highest risk profile. Defaqto's adviser research software 'Engage' allows advisers to extract their clients' mandates in a compliant manner, and to find suitable funds to match these.

This review was conducted in August 2023.

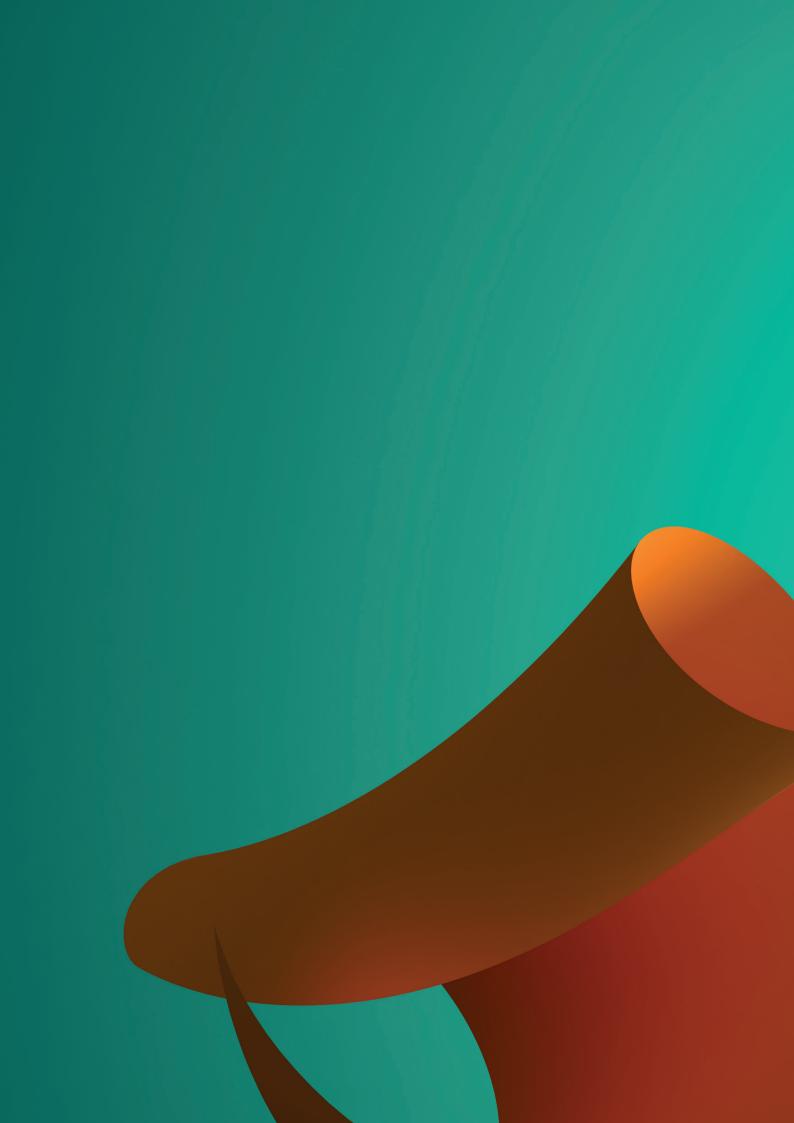

© Morningstar, Inc. Risk tolerance scores were mapped to the funds' strategic asset allocations as at 21/08/2023. The mappings are only for use by financial advisors licensed to use FinaMetrica, are for guidance purposes only and do not constitute financial or investment advice. Financial advisers must satisfy themselves that the funds' current asset allocations reflect the risk/return expectations of the funds when mapped. 7IM does pay Morningstar for the mappings in the table however these mappings are calculated independently by Morningstar.

 $^{\ast}\,$  Applies  $\boldsymbol{only}$  to Model Portfolios

\*\* Applies only to the Responsible Choice range
\*\*\* Applies only to the Passive range

# Things to note

7IM's funds are mapped against a selection of third party risk profiling tools to assist advisers as part of suitability assessments for clients. Such tools are however only one aspect of an adviser's suitability process and others such as the clients' investment term/horizon and knowledge and experience should also be considered.

The methodology of third party risk profiling tools is not endorsed by 7IM and individual fund risk profiling scores may not correspond precisely to the risk indicators in the 7IM fund literature.
